

Is your expired HVAC a Liability or an Asset?

Companies with high demand for heating and cooling realize they must keep up with their aging fleet through planned HVAC replacement. However, most of these companies consider the expired equipment a liability and give little or no consideration for the **tremendous value that can be realized through proper end of life recycling.**

AES Reclaim's focus is in helping companies with planned HVAC replacement programs turn their expired equipment into assets through our national reclaim and reuse programs. Our ability to **capture value** from reclaimed gases as well as building an inventory of reusable service parts for our clients, while providing an **EPA** documented, 100% cradle to grave release and **sustainability certification** nationwide, at **no cost to our clients**, is truly unique in the industry.

Obtain the liability release and asset value from your company's documented HVAC recycling efforts. **A recycling and salvage program with AES Reclaim is a partnership in sustainability and profit!**

Partner with a **specialist** in sustainability and profit from your **expired assets!**

HVAC Reclaim and Reuse Process

Equipment Transportation coordinated and covered by AES RECLAIM
- Equipment transported to one of our four national recycling centers.

Refrigerant Recovery handled by AES RECLAIM

- EPA Universal Certified Technician removes refrigerant
- Equipment disposal record (EDR) created for each unit
- EDR includes customer, model, serial, city, state, and refrigerant
- EDR information uploaded electronically for customer documentation

All components are 100% recycled and documented by AES RECLAIM
- Documented cradle to grave release of liability for customer

AES REUSE provides managed inventory of desired replacement parts

- Parts requested by customer for service replacement needs
- Parts less than 2 years age are viable cost avoidance options
- Coordinated and managed for customer with documented inventory
- Tremendous cost avoidance opportunity through service part reuse

AES RECLAIM Landfill Avoidance Report

- Customer's documentation of their sustainability program
- Provides complete record of all gases, oils and components harvested

**NATIONWIDE SERVICE
COST NEUTRAL PROGRAM
COST AVOIDANCE WITH REUSE
SUSTAINABLE CRADLE TO GRAVE**
